
BRANDLE OS – MASTER RELEASE (PARTS I–V)

“Decision infrastructure for identity.”
“Receipts everywhere. Drift nowhere.”

PART I – dRANb naming decision thread (generate → score → compare → decide)
PART II – brandL domains + handles + identity consistency + acquisition plans
PART II – 4IELD field intelligence + saturation + drift + conceptual map
PART III– 4TRESS non-legal readiness + templates + checklist + reminders
PART III– V4ULT universal archive (prompt packs, assumptions, deltas, lock/branch)
PART IV – Billing tiers + plan gating + usage meters + export gating/watermark
PART IV – Monitoring ... rerun deltas + knowledge drops (no scraping)
PART V – Governance ... Right to Oblivion + stratified data tiers + 6ROXY spend guardrail
PART V – Ops Cadence .. seeded schedule + templates + optional calendar export
PART V – Prompt Vault . read-only canonical prompts (versioned, immutable)

CANONICAL BUILD (LATEST)

url <https://lovable.dev/projects/89d53020-feae-4084-b26c-f0031952266e>

SYSTEM RULES (LOCKED)

- ☐ Trust-first: best-effort, confidence labeled, no hype
- ☐ No scraping claims; only user-provided inputs + heuristics
- ☐ Non-legal guidance only; never generate C&D letters; never threaten
- ☐ Receipts everywhere: scores, confidence, assumptions, deltas, evidence pins
- ☐ Privacy-first: opt-in stubs for biometric concepts; kill switch honored

.

Benediction: Build the fortress that prevents regret.
