
BRANDLE OS – PART II IMPLEMENTED

“Identity is consistency under constraint.”
“Field intelligence is receipts, not rumors.”

PART II – brandL + 4IELD (ENGINE II + ENGINE III)

› SOURCE INGESTED

..... Part 2 of 5.md

› SCOPE DELIVERED (FUNCTIONAL MODULES)

..... brandL identity consolidation across domain + handles + variants
..... 4IELD competitive field map + saturation signals (heuristics-only)

› BUILD CONTINUITY

..... Part II was integrated as an upgrade on top of Part I (dRANb preserved).

› brandL – WHAT YOU GET IN-APP

..... Identity Targets primary name + allowed variants + shortlist set
..... Domain Signals heuristic likelihood tiers + confidence + receipts
..... Handle Signals per-platform likelihood + confidence + constraints
..... Consistency Score uniformity + compromise cost + overall + receipts
..... Fallback Families deterministic handle families (tier-1 / tier-2)
..... Acquisition Plans review / outreach / do-not-pursue with safety notes
..... Outreach Templates A (default), B (requires trademark confirmation),
..... Email Neutral, Platform Report

› 4IELD – WHAT YOU GET IN-APP

..... Competitor Intake manual entry + CSV upload (name, website optional)
..... Clustering family clusters (string/phonetic heuristics)
..... Saturation Signals stems/prefix/suffix patterns flagged + confidence
..... Semantic Crowding best-effort approximation (no scraping claims)
..... Density Labels low/medium/high + receipts
..... Expansion Risk Zones heat labeling (green/amber/red) + receipts
..... Drift Baseline watchlist stub + rerun compare deltas
..... Visual Field Map conceptual node map + whitespace pockets (MVP)

› EXPORTS

..... Field section appended into main report package (Part II onward)
..... Separate Field Report export available in packs when enabled by plan

› V4ULT LOGGING

..... brandL and 4IELD runs logged as archive events (immutable receipts model)

› CLEARANCE

..... Part III is complete & Part IV is in motion. Next: Part V on your signal.

.

Benediction: Choose the name that survives the handles, not the pitch.
