
BRANDLE OS – PART IV IMPLEMENTED

“Discovery stays free. Decision artifacts are paid.”
“Growth is retention, not promises.”

PART IV – BUSINESS MODEL + BILLING + USAGE + INTEGRATIONS + GALAXY MODE

› SOURCE INGESTED

..... Part 4 of 5.md

› BUILD INITIATED (PART IV INTEGRATION)

..... projectId 0237f0a6-3ff1-4657-96d3-2fc121a211f2

..... url lovable.dev/projects/0237f0a6-3ff1-4657-96d3-2fc121a211f2

› PRICING & TIERS (CONFIGURABLE – NO HARD PROMISES)

..... Scout (Free) 1 project/month, limited generations, basic scoring
..... watermark report preview, exports locked

..... Founder / Pro full scoring + explanations + shortlist + exports

..... Company / Premium adds brandL + 4IELD + 4TRESS + Monitoring

..... Agency / Enterprise multi-brand workspaces, teams, white-label, API stubs

..... Pricing numbers differ in Part 4 references

..... Implementation: prices are editable in PlanConfig (admin-controlled)

› BILLING (MVP)

..... Settings → Billing plan selection + upgrade flow

..... Stripe placeholders /billing/portal stub + key slots (no claims)

..... Paywall receipts shows which limit was hit & why

› USAGE METERING (ENFORCED)

..... UsageMeter projects_created / generations_used / exports_used

..... Periodic reset monthly period windows

..... Scout limits enforced with calm upgrade prompts

› EXPORTS & WATERMARKING

..... Scout watermark PDF previews, export buttons locked

..... Paid PDF + DOCX + JSON exports enabled

› RETENTION LOOPS (NO SCRAPING)

..... Monitoring feed drift + crowding + manual policy log (4WIR3 stub)

..... Seasonal prompts nudges to re-check expansion zones

..... Knowledge drops procedural micro-lessons (Media Kit feed)

› INTEGRATION POINTS (DATA FLOW – NOW WIRED)

..... dRANb → brandL shortlist populates identity targets + variants

..... dRANb → 4IELD clusters become constraints + do-not-use patterns

..... brandL → 4TRESS identity bundle becomes evidence pins

..... 4IELD → dRANb safe corridors adjust scoring weights (receipts)

..... 4TRESS platform layer unified risk language + subscription gating + logs

› TECHNICAL SCAFFOLD (IN-APP DOCS)

..... API docs page endpoints documented (generate/score/export/billing)
..... Enterprise API keys placeholders only (secure storage stub)

› GALAXY MODE (OPT-IN UX SKIN ONLY)

..... Default UX remains calm & procedural
..... Galaxy Mode toggle adds cinematic labels & framing (Director / Actor)
..... No prosody detection, no mandatory cloning, no meetings
..... Avatar/clone concepts remain explicit stubs with consent + revocation copy

› DATABASE ADDITIONS (PART IV)

..... UsageMeter, PlanConfig, ApiKey (stub), MonitoringEvent

› CLEARANCE

..... You are clear to send Part 5 of 5.

.

Benediction: Price what's proven. Gate what's costly. Log what matters.
